

## TegoBloc® SA

Introducing GMX's TegoBloc® SA: the ultimate self-adhering waterproofing sheet. Composed of a cutting-edge multi-layer polymer film coated with our exclusive rubberized asphalt adhesive, TegoBloc® SA ensures maximum protection and durability.

Installation is simple. Just remove the release sheet, and apply to the primed substrate. Available in both 40-mil and 60-mil sheets, TegoBloc® SA offers versatility to meet your every need. Our 60-mil sheet also comes with a unique low-temperature adhesive formulation, ensuring optimal performance in any weather condition.

### Advantages

- + Factory-manufactured thickness, no application-related thickness variations
- + Self-sealing adhesive layer
- + Excellent elongation and tensile strength
- + Compatible with most sealants and primers
- + Superior adhesion with either a water based or solvent based primer
- + Excellent for high hydrostatic head pressures

### Tested

- + Hydrostatic head pressure greater than 200 ft.
- + Puncture resistance greater than 50 lbs.
- + Elongation 450% minimum
- + Membrane tensile strength of 580 psi
- + Film tensile strength of 7000 psi

### Environmental and Safety

- + Box and release liner can be recycled.

### Below Grade Assembly
