

TegoBloc™ Pre-Wrap

TegoBloc™ Pre-Wrap is an innovative waterproofing solution offering superior protection against water intrusion. Its flexible rubberized asphalt core and durable, high-density polyethylene base ensure maximum longevity and outperforming traditional methods. The biggest benefit of TegoBloc™ Pre-Wrap is its adaptability to challenging scenarios like blindside and under-slab conditions.

What sets TegoBloc™ Pre-Wrap apart is its unique ability to form a permanent bond with concrete. A strong bond secures the concrete to the membrane upon curing, providing a robust, long-term solution. Choose TegoBloc™ Pre-Wrap for exceptional waterproofing and true peace of mind.

Advantages

- + Reduces Methane and Radon gas intrusion
- + The membrane and concrete bond permanently during the curing process
- + Fully adhered waterproofing barrier in positive side limited access scenarios
- + Can be used for under-slab waterproofing and vapor proofing

Environmental and Safety

- + VOC-free
- + Environmentally safe
- + Radon Barrier
- + Methane Barrier

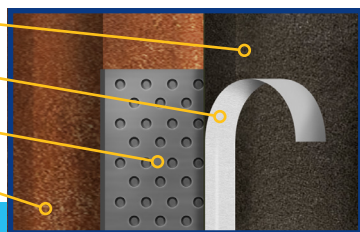

Fully Adhered Blindside Below Grade Waterproofing

TegoBloc™ Pre-Wrap

Release Liner

DrainMax®

Shoring System

TegoBloc™ Pre-Wrap Membrane

Top Layer

Fiber-entangled polypropylene non-woven fabric, engineered for optimal bonding to concrete

Bottom Layer

Cross-laminated polyethylene film with superior tensile and elongation properties

Middle Layer

Proprietary high tenacity, polymer modified waterproof membrane
