

Ultra-Guard® Elastomeric HB

GMX's proprietary, single-component, moisture cure membrane is designed to protect your structure like never before. This cutting edge, fluid applied membrane can confidently be installed on both vertical and horizontal surfaces, giving you unparalleled flexibility and peace of mind.

But that's not all! Ultra-Guard® Elastomeric HB lets you choose the perfect thickness for your project—whether it's a robust 60 mils, a heavy-duty 120 mils, or an unbeatable 120 mils fabric-reinforced installation. No matter your needs, GMX has you covered.

Advantages

- + No primer required
- + Fast and easy installation with minimal preparation work
- + Adheres aggressively to most substrates, especially green concrete
- + One-pass application up to 120 mils or build thickness with wet-on-wet or wet-on-dry applications
- + Faster installation than traditional fluid or sheet-applied waterproofing
- + 100% solids
- + Low odor & low VOC's
- + Rapid curing allows for quick backfill on vertical applications and faster installation of horizontal overburdens
- + Rain-ready in under 2 hours

Tested

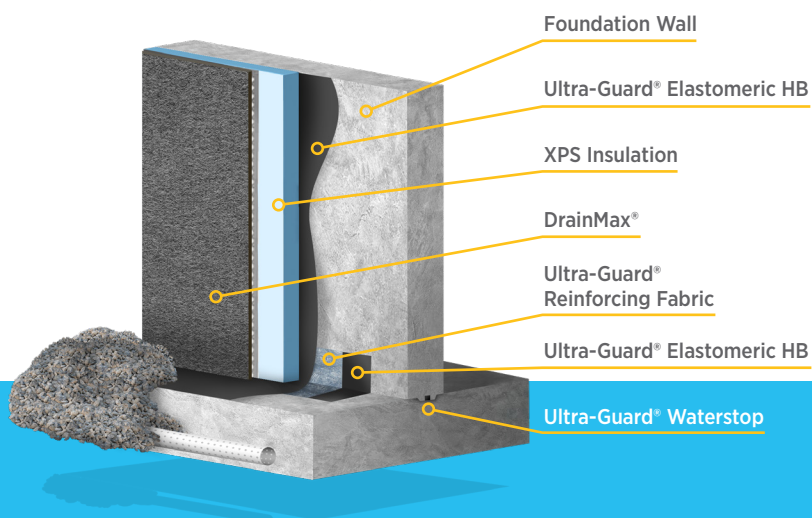

- + ASTM C836
- + Miami-Dade approval*
- + Florida product approval*
- + LARR*

**Pending*

Environmental and Safety

- + Solvent free and compliant with all known environmental and OSHA requirements
- + Can be used in confined spaces with standard personal protection equipment
- + Tin Free
